

vinyCom

Window reveal system

LASTING APPEAL.

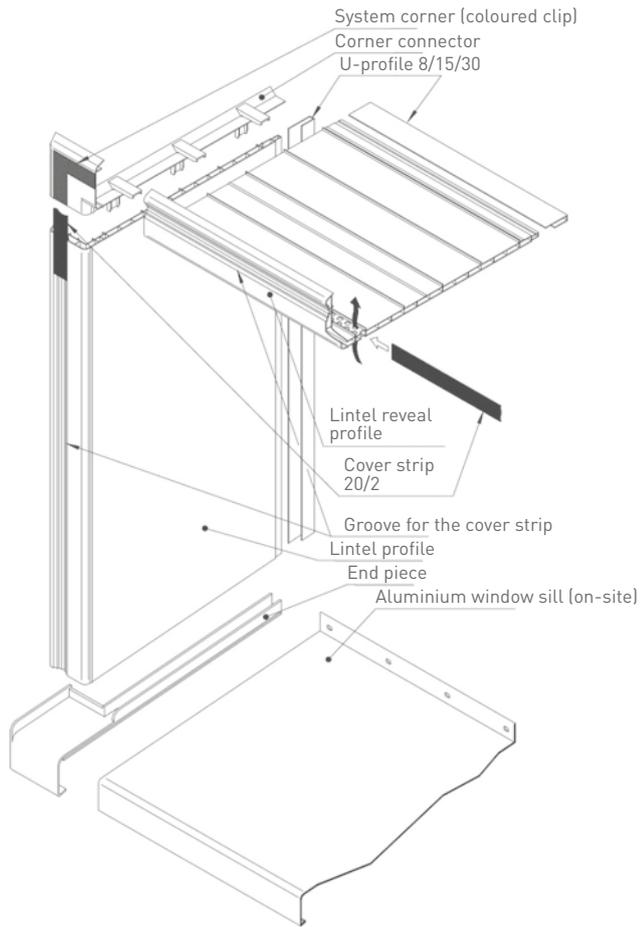

For windows and doors. **Compatible with all façade claddings.**

Are you thinking about equipping your house with a thick insulation? However, you would like the existing window and doors to blend harmoniously in the new cladding?

Click and ready.

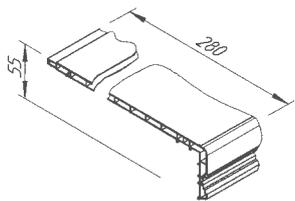

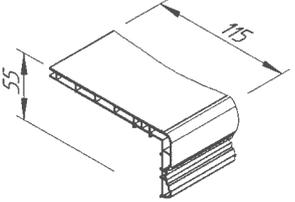

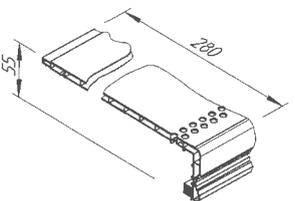

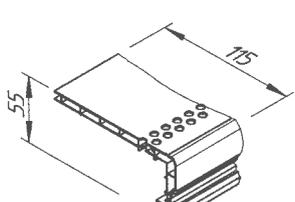

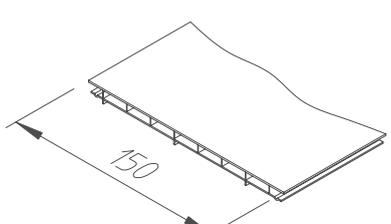

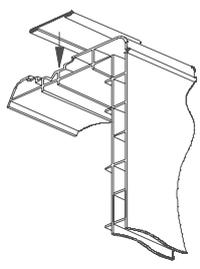

vinyCom window and door reveals are compatible with all standard façade claddings, no matter whether they are made of fibre cement, HPL, natural stone or a composite thermal insulation system. vinyCom is thus ideally suited for mixed façades. Window and door lintels are ventilated at 100% thanks to the vinyCom lintel reveal. This is particularly important for permanent air exchange especially for insulated houses. This prevents any moisture from depositing in the interior rooms. In combination with a rainscreen façade the entire building substance is permanently protected.

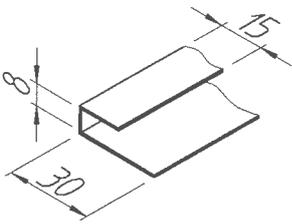

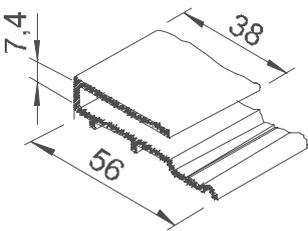

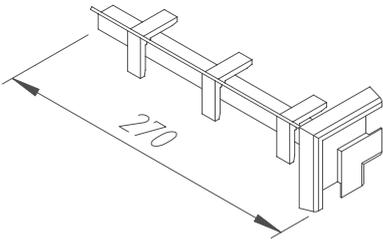

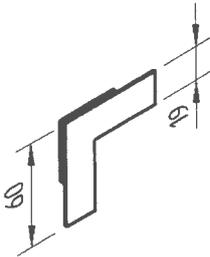

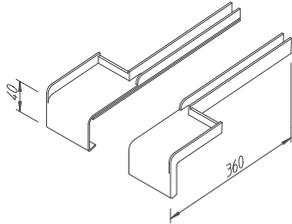

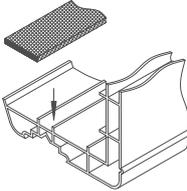

vinyCom can be used universally
vinyCom saves installation time
vinyCom stands for detailed design
vinyCom provides natural ventilation

The click and ready principle of vinyCom saves time-consuming cuts and fixings. Thanks to the vinyCom system corners, the reveal corners fit accurately to the millimetre even without mitre cuts. The cover strips are available in different colours. This lets you put colourful highlights on windows and doors.

Product, Dimensions in mm	Designation / Application	Decor / Colour	Item no.
	Reveal Profile 280 / 55 Length: 6,000 mm Item group: 214	White	21.30.11
