

vinyStone

Façades with natural stone texture

LASTING APPEAL.

vinyStone 400 (Ashlar), façade Alpin, base Basalt

Stone on stone. Beautiful as stone. Coated with stone.

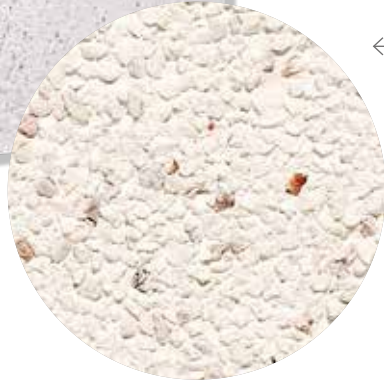

Have you always dreamt of a house with a natural stone wall? Of a façade in natural stone, which is quickly put up and yet remains beautiful forever?

Give your house a valuable cladding!

Just like the profiles of vinyTherm, vinyStone profiles are coated with high-quality natural stones. Surface texture and T-joint give the impression of a wall build with natural stones. Combine different natural stone surfaces and decorative shades with one another. This will lend your house an elegant appearance. vinyStone façades are also based on the principle of a rainscreen façade. This will provide your house with perfect weather protection, a heat and sound-insulated shell.

→ **vinylStone** Façade profile with natural stone texture

Stone surfaces with a natural appearance and decorative colours open a variety of individual design variants.
